## H2020 Innovation Tools:

### SME Instrument & Fast Track to Innovation Pilot

Danielle Baetens

27.6.2016, 12:00 – 16:30

University Centre for Energy Efficient Buildings (UCEEB), Třinecká 1024, Buštěhrad

The workshop will introduce and provide insights in the specific subsidies Europe has installed since the new Horizon 2020 programme in 2014. The [SME Instrument](#) and the [Fast Track to Innovation pilot](#) both support companies' proposals for close-to-market innovation activities in any area of technology or application. The programmes provide funding for large investments to expand the production site for the innovative technology.

12.00 – 12.30	Arrival & Registration
12:30 – 13:00	Welcome and Introduction
13:00 – 14:00	SME programme, Q&A and Interaction
14.00 – 14.30	Coffee break
14.30 – 15.30	Fast Track to Innovation Pilot, Q&A and Interaction
15:30 – 16:30	Successful projects, Q&A and Interaction

**All participants are invited to join UCEEB traditional Midsummer meeting with partners that starts after the workshop at 17:00.**

PhD. Msc. Bsc. Danielle Baetens is an innovation expert with a degree in chemical engineering (University of Ghent) and a PhD in applied biological sciences from (University of Ghent). Danielle has over 25 years of experience in national and European subsidies and a master in Innovation Management. She worked as senior manager at Deloitte Grants & Incentives and was director at Ernst & Young Subsidia. Previously, Danielle successfully applied for grants for both herself and for colleagues as researcher at the University of Ghent and VITO. Since 2010 she has ran her own company, Grant@vice. Danielle has written and advised on a wide range of R&D proposals for more than 250 SMEs, large companies and research organisations, securing them national and European subsidies.
